in the **NEWS**

Minnesota's Driver Appreciation Day Wednesday, February 28th

There will be many events happening throughout MN.

The MAPT announced the theme for this year's event is 'Celebrating our Humble Heroes.' We think this theme is fitting for school bus drivers who work hard each day to keep kids safe.

At 10 am on February 28th, a press conference will be held in the Twin Cities which will include remarks from a school superintendent, a principal, a State legislator, a State Patrol official, and others. At the event, students and parents will hand out food and beverages to school bus drivers to show gratitude for the work they do each day. Exceptional school bus drivers will also be recognized at this event. If you know of any exceptional school bus drivers in your community who should be recognized, email Kate Braun at Kate@GoffPublic.com. This press conference is just one component of what we hope will be a large-scale day of appreciation across Minnesota.

- We are going digital with the School Bus Flyers! If you are not signed up to receive our monthly e-newsletters, please email marketing@hoglundbus.com to get signed up! We will continue to print the School Bus Flyer quarterly for 2018.

Join us at the following trade shows and catch up on the latest Industry News and Events!

April 7th & 8th - NSBA (National School Boards Association) - Henry B. Gonzalez Convention Center, [Booth 931](#)

May 5th - Minnesota School Bus Rodeo - Arden Hills Exam Station

May 9th - 11th - MASBO - MN Association of School Business Officials - Duluth Entertainment Convention Center

Training will be held in Tulsa, OK at the IC Factory. This five day training includes a Tulsa bus plant tour and comprehensive training on parts, service and maintenance. Please contact your Hoglund Bus sales rep for more details including cost and registration.

Bus Passenger Window Troubleshooting

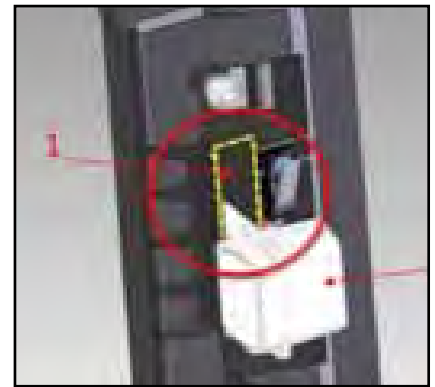

Applies To: Bus windows built after 4/17/17

Symptom: Emergency Exit Windows-Handle is hard to open and close. May feel like it is binding or operating irregularly.

Parts: WD-40® Specialist® DIRT & DUST RESISTANT DRY LUBE PTFE SPRAY or an equivalent PTFE dry lubricant can be used. Purchase locally.

Diagnostic:

Is the handle (see figure 1) on the emergency exit window harder than normal to operate. May feel like it is binding or operating irregularly. Cold weather may also impact ability to open. if yes, apply dry lubricant as illustrated in repair steps below.

1. Open window
2. Slide retainer tabs down
3. Apply lubricant in the area shown by the arrow in Figure 2, for both the upper and lower retainer tabs.
4. Move retainer tabs up and down as shown here, to allow lubricant to enter mechanism.
5. Apply lubricant to area shown below in Figure 3, the cover does not have to be removed
6. Move handle catch up and down, to allow lubricant to enter mechanism
7. Close window
8. Wait 30 seconds after closing window and operate window normally
9. If an excess of lubricant is present, it can be cleaned by using a clean rag that is moistened with soapy water (dilute a tea spoon of Dawn dishwasher soap into a gallon of water). Wipe excess away and then rewipe with a dry clean rag. DO NOT wipe inside or around switch area (figure 3 item 1).
