# PARTS SPECIALS

## WELDON SUPPLEMENTAL WARNING LIGHT

Part #: W3200-00-11

**\$329.75 ea.**

### Mounting Spec Guidelines:

- May not be mounted directly to either the front or rear bumper
- Must meet inspector approval
- Rear location: 1" - 3" above the bumper, with a maximum of 4" above the bumper; at least 1" inboard from the outside edge of the bus, but left and right of the emergency door; must sit horizontally rather than vertically; the lens of the light must be approximately perpendicular to the ground and to the outside edge of the bus body.
- Front location is dependent on the hood design: must locate somewhere between the outer edge of the grill opening and the outer edge of the headlight(s); must sit horizontally rather than vertically; the lens of the light must be approximately perpendicular to the ground and to the outside edge of the bus body.
- Must be a four light system (two front, two rear).

## Rosco Vision Systems SAFE-T-SCOPE 360

Rosco Vision Systems will be launching a new 360° surround camera system called Safe-T-Scope 360™. This system has the proven reliability of the Safe-T-Scope Series cameras with the 360° coverage of the vehicle.

- 4 cameras each with 185° field of vision allows the driver to see everything around the vehicle
- Increase driver awareness
- Provide visual coverage of blind zones that are pertinent to large vehicles
- Reduce risk of collisions with vulnerable road users
- Provides clear vision on sides of vehicles for narrow roadways
- Expanded side vision when reversing into a blind zone.

Our Parts Department carries an extensive inventory of "All Makes" products and can supply everything needed to keep your vehicles running smoothly. Our goal is to make ordering parts as easy as possible!

**SUPER SPACER® TriSeal™**

New storm windows are currently in production at IC Bus. Super Spacer® TriSeal™ is a flexible, silicone spacer designed to satisfy the toughest commercial glazing demands including silicone structural glazing. Its unique triple-seal design incorporates an inner acrylic adhesive seal for immediate unit handling. TriSeal™ comes complete with a polyisobutylene primary seal for enhanced gas retention and low moisture vapor transmission. The silicone seal provides proven structural performance.

**Features:**

- Unique triple seal design
- Inner acrylic adhesive seal for immediate unit handling
- Complete with polyisobutylene primary seal
- Excellent durability for sustainable performance

**Benefits:**

- Optimized energy savings and structural strength against wind and snow loads
- Low moisture-vapor transmission
- Enhanced environmental comfort and health near windows
- Excellent condensation resistance, mold resistance and color stability
- Excellent durability for sustainable performance
- Added value and differentiation

**OnCommand Parts & Service Portal**

OnCommand Parts & Service Information provides technicians access to the most up-to-date, VIN-based service and parts information. It's an invaluable centralized source of essential service information to help improve vehicle repairs and maintenance, repair shop efficiency, technical knowledge and vehicle uptime.

**Features and Benefits:**

- With a subscription, technicians can gain real-time, up-to-date VIN-based service and parts information
- Locate technical information by major component group, model, vendor, engine and feature code
- Service manuals and bulletins are illustrated and include repair, overhaul, troubleshooting tips and diagnostic information
- Access to iKNOW technical database to search service articles by entering symptom terms and/or descriptions

With a login, you will have access to OnCommand's service and parts portal. If you would like to sign up for this fee-based service portal, please contact Cassie Angell at 763.271.2973, mnpartscoord@hoglundbus.com.

## Side Emergency Exit Windows Latch Shim

**Applies to:** BE, CE, FE and RE School Bus with Vertical Hinge Side Emergency Windows

**Description:** Activation or arming of the emergency exit alarm during operation of a unit may be the result of insufficient window latch clamp load. Installing a shim as shown below will increase the closing pressure and latch retention. Issue verification should include verifying the condition is related to the window latch retention and not a switch or circuit issue. This issue is typically not found on all vertical hinge emergency windows and should only be used if required. Prior authorization from your area Customer Support Engineer (CSE) is required for warranty reimbursement. Windows produced after June 2009 have the shim installed during production.

Reference: iKNow Article IK2200096

**Resolution:**

Install the shim shown in the picture

**Parts Information:**

Part #:	Description:	Qty.
2228202C1	Shim	1 per latch
430530001	Rivet (.250" x .080" x .625" Grip)	2 per latch

### March Service Special

# \$349.<sup>00</sup>

**Service includes:**

Installation of any four camera system for all school bus makes.

\* Camera system sold separately

## Bus, Passenger Window Plastic Guide

**Applies to:** BE, CE, FE and RE Bus Models Built Prior to August 18, 2011

Reference: iKNow Article IK2200060

**Description:** Passenger split sash windows that are hard to slide and exhibit latching issues may have the plastic slide broken loose and out of position causing the window to bind. **Note:** Windows should be closed using both hands and closed with sufficient pressure applied to compress the upper seal allowing both latches to fully engage the side extrusion. Alternate methods used to close the passenger windows can result in damaged latch tips or an appearance of a crooked window.

**SYMPTOMS** Windows that are hard to slide up and down • Windows that appear to be out of square • Windows that only latch on one side

**Troubleshooting** In some cases, visual inspection of the split sash track will allow you to see the plastic guide protruding out past the bottom of the split sash.

The plastic guide protruding out the bottom of the sliding sash

To repair windows with the plastic guide visible as shown to the left, remove the window assembly and disassemble window frame to remove the sliding sash.

Above photo shows the plastic guide in the original position.

Above photo shows the plastic guide loose and out of position.

### RESOLUTION

Remove plastic guide and remove any loose adhesive from the plastic slide and extrusion. Remove the inner assembly screw from the top part of the extrusion

The plastic guide will be repositioned allowing the assembly screw to retain the guide. Position the plastic guide end approximately centered between the removed screw and the remaining screw. Mark the plastic guide in preparation of drilling.

Drill a 3/16" hole in the plastic guide.

Reinstall the guide and assembly screw. Reassemble window and reinstall.

### Front Line Tech Support

We invite you to contact our Tech Helpline with any technical or training questions you may have.
